TF TechfestTM ***2019 - 20***

ASIA'S LARGEST SCIENCE AND TECHNOLOGY FESTIVAL

3rd - 5th January, 2020

techfest.org

Techfest, IIT Bombay was started in 1998 with the motto of promoting technology, scientific thinking, innovation and exchange of ideas. It provides a platform for one and all to witness one of the most beautiful amalgamations of science and technology with pure delight and enthusiasm. Techfest has gradually diversified into an organisation that, apart from showcasing the pinnacle of technical advancement, strives for developing a socially responsible outlook amongst today's youth. Team Techfest aspires to focus the mind and efforts of the youth towards creating a better and sustainable future.

The Indian Institute of Technology, (IIT) Bombay's annual Techfest is set to begin from tomorrow, December 16. Based on the theme of Space Expedition, the first day of the fest see a series of lectures, competitions and summits at the institute's Powai campus as well as exhibitions by students from institutes

Tiniest satellite to be showcased at IIT(B) Techfest

TNN | Updated: Nov 30, 2017, 0:46 IST

KalamSat was launched on June 22 by a Nasa sounding rocket from the Wallops Island facility

MUMBAI: The world's lightest and smallest satellite, KalamSat, weighing only 0.64gm, which broke an international space record on June 22, will be showcased at IIT Bombay's Techfest 2017-18 between December 29-31.

Anirudh Poddar of Techfest said the event will be an effective platform to display KalamSat as it is Asia's largest science and technology

festival with footfalls of more than 1,60,000 people.

Witness the cutting edge

Mumbai Mirror | Updated: Dec 15, 2018, 06:00 IST

IIT-Bombay's Techfest is back, offering plenty of knowledge and entertainment for science and technology enthusiasts

International Robowars, the biggest crowd-puller at Techfest each year, takes place at IIT-Bombay's open-air amphitheatre through the weekend, with teams from around the world – and their robots – doing battle

A student experiences a 3D-printed bionic arm at the Techfest exhibition. The arm is based on the open-source Hackberry platform, which its developers hope will be adopted by engineers around the world to develop robotic arms in various fields, from search and rescue operations to aiding people with disabilities.

A football-playing humanoid robot from B-Human in action at the Techfest exhibition. The German team is part of a collegiate project at the Department of Computer Science of the University of Bremen. It is a six-time world champion of the RoboCup Standard Platform League and has won the RoboCup German Open eight times in a row.

India's First 3D Printed Humanoid Robot 'Manav' Launched at IIT Mumbai TechFest 2015

The robot can play football, perform acrobatics and also can follow most of the human instructions
